

In the culmination of a two-year project, the GSRA Board has approved the 2023-2025 Strategic Plan which will inform and guide the work of the organization at every level. The plan is intended to provide structure and continuity for the organization and a framework for leadership's decision-making for assuring the continuing growth and development of GSRA.

The plan development work began with a Board sub-committee coming to consensus on what GSRA's Vision and Mission should be. These are the statements that represent us both to our members and to the world.

The Multi-year Plan is a dynamic document which the Board will revisit and review periodically and adjust as necessary. It is not a prescriptive plan: It is meant to facilitate creative thinking, problem-solving and innovation in assuring that we are staying true to our Vision and Mission and using our resources in the most efficient and effective manner.

This is the first step in "rolling out" the Plan to our members. There will be opportunities for discussion in coming months and there will be a workshop session to provide an overview at the 2022 Annual Meeting.

Please let us know if you have questions or comments about the process or the results of the committee's work.
